---

## Technical Skills

- **Languages:** JavaScript, TypeScript, Java, C++, C#, Python, HTML/CSS
- **Technologies:** React, Vue, Vuex, ThreeJS, Express, Node, WPF, .NET, MongoDB
- **Tools:** Git, Postman, Heroku, Netlify, Jest

---

## Experience

**Software Engineering Intern** / Microsoft – Vancouver, BC Feb 2023 – Present

- Implementing new features for several automation applications used in game development at The Coalition
- Developing a platform to allow the use of software tools through cloud services
- Overhauled current processes to allow custom tests for various game builds and devices using **C#** and **WPF**

**Game Developer** / ArenaX Labs – Toronto, ON Mar 2022 – Nov 2022

- Designed and implemented core game logic for an AI-based fighter game using **JavaScript** and **ThreeJS**
- Reduced opponent knockout computation time by **90%** through approximation of knockback trajectory
- Improved existing visual effects system to allow queuing and playing multiple effects simultaneously
- Streamlined collision detection system by reworking existing spatial hash map updates

**Software Engineering Intern** / MCAP Mortgages – Waterloo, ON Sept 2021 - Dec 2021

- Implemented front-end features for a large-scale mortgage web application using **Vue** and **VueX**
- Ensured code security through test-driven development by creating unit tests for application modules using **Jest**
- Optimized project timelines by effectively managing tasks in an **Agile** environment

**Process Engineer** / BWX Technologies – Cambridge, ON Jan 2021 – Apr 2021

- Overhauled training evaluation software for a multi-million-dollar nuclear project using **Excel VBA**
- Improved data collection efficiency by **50%** by implementing user feedback and optimizing data compiling features
- Assessed training processes with collected data to evaluate inefficient procedures and provide recommendations

---

## Projects

**BrawlBuddies** – Full Stack Web Application [↗](#) Feb 2021 – June 2021

- Created a website to retrieve Brawlhalla player data and match users in the same region with similar in-game rank
- Encrypted and secured user information stored in a **MongoDB** database using **JSONWebToken** authentication
- Retrieved and updated player data by processing server requests through a **REST API** created with **Express**
- Dynamically rendered player information using **React** components and **MaterialUI**

**Workout Tracker** – MERN Stack Application [↗](#) Feb 2021 – Mar 2021

- Developed a web application to create, edit, and display workouts stored in a **MongoDB** database
- Constructed an **Express** server to handle POST and GET requests for retrieving and creating workouts
- Accepted and displayed user input dynamically using **React**

**Escape The Cave** – Java Mobile Game [↗](#) June 2020 – Aug 2020

- Developed a score-based mobile application that involves player interaction with a virtual character using **Java** and **Android Studios**
- Worked through several iterations to fix diagnostic issues and optimize the performance of the application

---

## Education

**University of Waterloo** – Waterloo, ON 2019 - 2024

**Bachelor of Applied Sciences** – Mechanical Engineering Co-op
